

**“Whether you add air duct cleaning to your existing business or start a new business, the Rotobrush aiR<sup>+</sup>® is the right tool for the job.”**

## The Air Duct Cleaning Opportunity

### DEAR FRIEND,

Congratulations! You have taken the first step to providing a valuable service in one of the fastest growing industries—Indoor Air Quality. Whether you add air duct cleaning to your existing business or are starting a new business, the Rotobrush aiR<sup>+</sup> is the right tool for the job. And we are here to help you succeed by providing more than just equipment. We offer marketing help, financing options, comprehensive training, and a 24/7 customer service hotline.

### DON'T DRIVE CUSTOMERS TO YOUR COMPETITORS

You could lose customers to your competition by not providing air duct cleaning services. There is no need to push your customers into the arms of your competitors, because the addition of air duct cleaning services is low cost and pain free. Instead, use air duct cleaning to drive customers to you.

### USE AIR DUCT CLEANING TO EXPAND YOUR CURRENT BUSINESS

You understand how important equipment replacements are to your business. Adding air duct cleaning as a value-added service for your customer is a great closing tool when competing for an equipment replacement bid. Plus, providing freshly cleaned air ducts when installing a brand new furnace just makes sense. Why circulate all the old dirt and debris through a new air handler?

[Click here to view the video: http://www.rotobrush.com/opportunities/hvac.aspx](http://www.rotobrush.com/opportunities/hvac.aspx) and discover the Rotobrush opportunity.

Our main goal is creating relationships with our customers, and we look forward to developing such a relationship with you. Each of our associates take pride in helping you achieve your professional goals, whether providing this valuable service to your existing customers or by helping you start your own full-time or part-time business.

**“I had inquires for air duct cleaning, and I was tired of referring the business away to my competition. I also wanted to be unique from other contractors in the services I provided. The Rotobrush has been great. It helped me increase my replacement sales by at least 60 percent! The Rotobrush is the right machine for the job.”**

- Erich Husch, HVAC Contractor

**“Once we started including air duct cleaning as part of our replacement HVAC systems quotes, we increased our close rate from 40% to over 85%. The Rotobrush paid for itself after only 2 months!”**

- Rick Nees, HVAC Contractor

# The Rotobrush Air Duct Cleaning System

PATENTED TECHNOLOGY • PORTABLE • POWERFUL • MODULAR

## **A** HOSE AND BRUSH SYSTEM

The brush system rotates at 450 rpm to loosen the debris from the inside walls of the air ducts. As it is loosened, the debris is then vacuumed up in the nozzle located behind the head of the brush. This combination ensures professionally cleaned air ducts for your customers. Because the rotating cable is enclosed within the hose, it is safe to use in every type of duct application.

## **B** VERSATILE POD DESIGN

The Rotobrush *aiR*<sup>+</sup> Pod design makes even the toughest work spaces easy to clean. The Pod is easily removed from the Carrier to allow you to go into tight spaces such as attics and crawl spaces. This versatility will enable you to reach throughout the air duct system and provide your customers a more professional service.

## **C** ADVANCED DESIGN

The Rotobrush *aiR*<sup>+</sup> has been engineered for ease-of-use. Sloping sides allow quick coiling and maximum maneuverability. The modular design makes transport and air duct cleaning easy.

## **D** ADJUSTABLE HANDLE

This handle allows the Rotobrush *aiR*<sup>+</sup> to be easily maneuvered into tight spaces. When the job is done, the handle collapses down so that the machine fits into your truck or vehicle with no hassle.

## **E** POWERFUL VACUUM SYSTEM

The Rotobrush *aiR*<sup>+</sup> is not only more portable, but is also more powerful. The redesigned air path has resulted in a 30%+ increase in vacuum power. This additional vacuum power makes it easier to remove even heavy build up seen in many air duct systems.

## **F** STORAGE COMPARTMENT

The rear compartment of the base unit provides storage for the power cord, control cord, brush/vac controller and owner's manual.

## **G** LARGE DIAMETER REAR WHEELS

These heavy duty, semi-pneumatic Rotobrush *aiR*<sup>+</sup> wheels make rough surfaces, front porch steps and stairways easy to navigate. The large 12" diameter tires with solid steel wheels provide strength and traction on slick surfaces without scuffing up floors.

## **H** LOCKABLE CASTERS

Negotiating narrow hallways and rooms filled with furniture is no problem with these 4" industrial casters. They allow the Rotobrush *aiR*<sup>+</sup> to turn 360° on its center axis.

Locks keep the base stationary while in use or being transported in your vehicle.

## **I** HEAVY DUTY BODY

The Rotobrush *aiR*<sup>+</sup> Carrier and removable Pod are constructed of thick, high quality polypropylene. Both are rotomolded for superior strength with a textured finish for greater durability.

# Air Duct Cleaning Made Simple

## The Rotobrush cleaning process is as simple 1-2-3.

The Rotobrush cleaning process is effective in all types of ductwork including sheet metal, flex duct, and fiberboard ductwork. You can even connect the Roto-Vision™ video inspection system to the Rotobrush aiR+ so both you and your customer can see – live – what you are cleaning inside the ductwork!

Let's face it: all air ducts would be most efficiently cleaned by simply crawling inside the ducts and hand vacuuming with a brush. But since that is not practical in most applications, the Rotobrush cleaning process was developed. It is the only self-contained method that brushes and vacuums the debris at the same time, similar to contact cleaning by hand. Dirt is brushed loose inside the air duct and immediately swept up by the powerful dual vacuums. This system eliminates the need for a central collection unit attached at the plenum and because of this, dirt and debris do not have to travel through the entire HVAC system to be collected.

### 1 CLEAN THE AIR DUCTS WITH THE ROTOBURSH aiR+

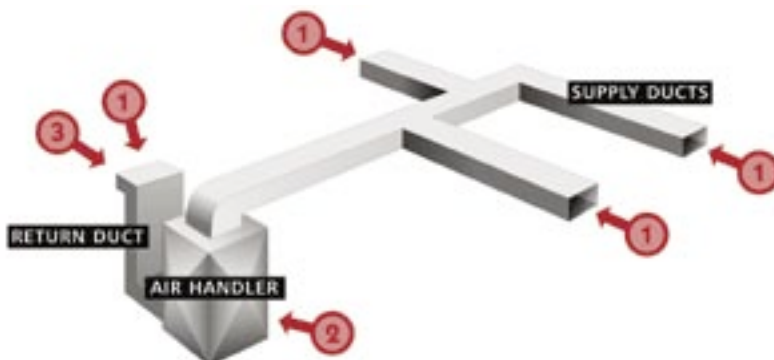

Remove and clean the registers. With the Rotobrush aiR+, start cleaning through the supply vents and work your way back to the air handler. As you work the Rotobrush aiR+ back through the system, you will overlap much of the ductwork. This will ensure that you are getting optimum coverage throughout the ductwork system, a necessity for proper cleaning. Finish by cleaning the cold air return ductwork with the same process.

### 2 CLEAN THE AIR HANDLER

Use the Rotobrush aiR+ powerful shop vacuum attachment to topically clean inside the air handler.

### 3 APPLY THE ANTIMICROBIAL INTO THE SYSTEM

Turn on the air handler fan and use the Rotobrush aiR+ fogger to fog the antimicrobial treatment into the cold air return. The fan will circulate the treatment deep into the system.
